# Announcement : AT&SF/BNSF “William Barstow Strong”, HO

Broadway Limited is thrilled to announce a newly tooled business car coming to HO scale! Introducing the AT&SF/BNSF “William Barstow Strong”.

Our TrainFest announcement is for HO scalers who have been asking for more business cars! We are continuing our commitment to bringing as many business cars to market as we can! This time a new business car that is accurate for Santa Fe and BNSF modelers out there. Introducing in HO scale, the “William Barstow Strong” theater car!

In our first production run, we are building 6 different types of the car in multiple appearances over the course of it's life. Each model boasts both **road specific** and **era-specific** details! Ensuring that your customers BNSF or AT&SF theater car is the perfect fit for their office car special!

**About the prototype:** The William Barstow Strong began its life as Coach Bar Lounge Car #1397 before being rebuilt as a Track Inspection Car in 1975. At the time, it was renamed William Barstow Strong in honor of the former president of the Atchison, Topeka & Santa Fe Railway—who also inspired the naming of the city of Barstow, California.

In August 1990, the car underwent another transformation, this time into a Theatre Lounge Car, and soon became a familiar sight on the rear of Santa Fe Executive Trains. It also had the distinction of bringing up the rear of Santa Fe 3751's celebrated cross-country excursion between Los Angeles, California, and Chicago, Illinois, during the summer of 1992.

After the 1995 merger with Burlington Northern, the car received several exterior and interior updates and was renumbered from #89 to #32. Today, the William Barstow Strong remains in service with BNSF Railway, continuing its legacy by transporting company executives across the railroad's vast system.
