New From Kato: N Scale ES44s. The GE ES44 is one of the most successful and widely used diesel-electric locomotives in modern North American railroading. Introduced by GE Transportation in the early 2000s, it was designed specifically to meet the EPA's Tier 2 emissions standards. Find out more information at KatoUSA.com

Features:

- Drop in DCC compatible
- Multiple body styles to reflect different "as delivered" railroad specifications
- Powerful 5-pole Kato Motor
- Illuminated Ditch Lights
- Kato Magnetic Knuckle Coupler
- Directional Headlight and illuminated numberboards
