**COVER STORY:** Fast freight is more than just a slogan on the Pennsylvania Railroad these days! Roaring east and west on tight 32-hour schedules, the road's Merchandise Service trains expedite package shipments over the 900 miles separating New York and Chicago every day. At the heart of each train is a fleet of upgraded X29B boxcars rebuilt with bigger bodies for an increased payload and specially painted to promote the service. Today's train is lead by one of the road's dual-purpose FP7 diesels (Class EFP-15), equally at home on freight as well as mail and passenger runs. Bring this exciting era to life on your HO layout in minutes with this new series from Walther'sProto®, that includes special 12-Car sets with matching cabin car (caboose) showcased on page 24 inside, and correct FP7s in two authentic scheme, listed on page 11.

**THIS PAGE: Born to Run** – The long days of summer bring a steady parade of ore trains all across the Missabe Road. From staples to support beams, typewriters to tin cans, demand for steel is nonstop so trains roll day and night to keep the blast furnaces fed and running. Operations these days are a blend of old and new, as a rugged and reliable SD9 handles a long string of empty cars, updated over the past winter with side extensions to handle lighter taconite pellets. Green signals greet the approaching train, and with a wave from the fireman, the big six-axle unit urges the cars ahead. No matter what kind of cargo your railroad moves, you need the right motive power to get the job done. HO modelers will find a great selection of diesels from every era like the SD9 shown here, and the next run of GP35s at upper left and more, in the special showcase of Walther'sProto and Walther'sMainline® models starting on page 4 to get your operations moving!

## THE RIGHT DIESEL POWER FOR ANY HO RAILROAD

Whether heading up fast passenger runs, shuffling cars through busy yards, drifting along quiet branch lines, or moving today's heavy tonnage that demands six-axle power, there's a Walther loco ready and waiting for your toughest assignments!

Pick the power that meets - and exceeds - your expectations with super-detailed WaltherProto replicas, and the affordable workhorses from WaltherMainline.

### ATTENTION TO EVERY DETAIL

Engineered for excellence, every Walther's model is a faithful replica, matching prototype design, dimensions and details! For modelers who want ultimate realism without the work, each Walther'sProto engine comes fully assembled and packed with era- and road-specific details - many tooled especially for that release!

For hands-on operation at clubs, shows or home, Walther'sMainline engines feature rugged detail that stands up to frequent handling. They're easily superdetailed at any time with Walther's own Diesel Detail kits and add-on parts from our many suppliers.

### PROVEN POWER AND PERFORMANCE

Under the hood of every Walther'sProto and Walther'sMainline model, you'll find a state-of-the-art drive with a five-pole, skew-wound can motor, flywheel and 14:1 helical-cut gears. A heavy die-cast metal chassis, all-wheel drive and electrical pick-up, LED lighting and more are all standard on every engine. Together, this rugged and reliable design delivers quiet, smooth performance at any speed whether running alone or MU'ed with other power.

### A SOUND INVESTMENT IN REALISTIC OPERATION

Whether you want your engines with "all the bells and whistles," prefer to install your favorite DCC decoders, or run standard DC, Walther'sProto and Walther'sMainline have you covered!

All DCC-equipped models come from the factory ready to enjoy with dual-mode decoders for DCC- or DC-powered layouts; Walther'sProto replicas are equipped with ESU LokSound 5 decoders, while Walther'sMainline models feature basic ESU Sound & DCC decoders. Each delivers a full range of sounds including prime mover, brakes, authentic air horns, bells and more. A 21-pin DCC plug is standard on most current production DCC and DC units, for quick and easy upgrades at anytime.

## WALTHERS MAINLINE®

### TOUGH ON THE OUTSIDE, TOUGH ON THE INSIDE!

Whether you're running on a club layout, show display or at home, WaltherMainline engines are built to stand up to the toughest HO operating environments.

At the heart of every model is the same rugged, proven drive used in WaltherProto locomotives. This state-of-the-art system is built around a can motor, featuring a five-pole, skew wound armature that provides smooth starts and stops, and plenty of power. The drive train is equipped with 14:1 helical cut gears that reduce operating noise, and provide superior strength that translates into outstanding pulling power and longer operating life. All-wheel-drive and electrical pick up, along with a flywheel keep trains moving past dirty track and other potential power drops. A heavy die-cast metal frame that keeps the weight on those correct size RP-25 metal wheels, makes for impressive pulling power with long or short trains.

Durable details on the body shell stand-up to frequent handling with no danger of breaking off, and Walther's own Proto MAX™ metal knuckle couplers stand up under pressure when others won't.

## WALTHERSPROTO®

### MORE THAN JUST A MODEL

Uncompromising attention to every detail takes every WaltherProto engine to a new level of realism. Superb tooling, capturing the correct contours and lines of the prototypes, provides a solid starting point for the wealth of road- and era-specific details that set WaltherProto models apart. Correct air horns, radio antennas, headlight styles and auxiliary lighting as appropriate, truck sideframes, handrails, pilots, dynamic or nondynamic brake and much more - many newly-tooled especially for each release - are factory-applied, or included as options with undecorated versions.

Along with great details on the outside, every WaltherProto engine is available with factory-installed, fully-featured LokSound 5 Sound & DCC control. Accurate prime-mover sounds, multiple programmable choices for air horns and bells, plus sound effects including coupler clash and dynamic brakes, add a new dimension of fun to operations.

Beauty isn't just skin deep; under that beautifully detailed body you'll find the proven power of the WaltherProto drive. Built for years of dependable service with unrivaled pulling power, a five-pole, skew-wound can motor, flywheel, 14:1 helical gears, all-wheel drive and electrical pick up deliver a full range of realistic speeds for any job.
