GE P42 Locomotive

Check [walters.com](https://www.walters.com) for current pricing.

Bring modern passenger rail power to your H0 layout with the sleek and powerful General Electric P42 diesel locomotive. Featuring all-new tooling and available with factory installed ESU® Sound & DCC, this H0 scale P42 is the perfect choice for expanding your passenger fleet.

First built by General Electric between 1992 and 2001, the P42 "Genesis" is now one of the most recognizable diesel electric locomotives on North American Rails. The locomotive's 4250 hp diesel engine helps it achieve a top speed of 110 mph. Most of the units serve on Amtrak® intercity service throughout the United States, although several are in operation north of the border with Via Rail Canada.

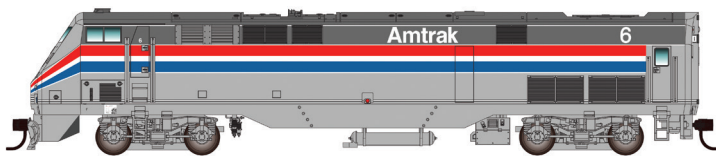

The newly tooled WaltherMainline model captures all the details of its modern classic prototype, including accurate molded and separately applied parts and prototypical paint schemes. A top of the line WaltherProto® drive, metal Proto MAX™ couplers, LED lighting, and metal wheels ensure a lifetime of reliable operation.

Other features include:

- Available with factory installed ESU Sound and DCC decoder featuring:
 - Dual mode DC/DCC compatible
 - 4, 28 or 128 speed steps
 - 4 function outputs with brightness control by CV
 - Air horn and bell sounds changeable by CV
 - Operating ditch lights flash when horn is sounded
- Same powerful drive as WaltherProto® locomotives:
 - Five-pole skew-wound motor reliable, trouble free operation
 - 14:1 gear ratio for exceptional slow-speed performance
 - Helical-cut gears for quiet operation & easy multiple-unit running
 - All-wheel drive and electrical pickup for exceptional pulling power

- Dual-machined brass flywheels for smooth motor operation
- Heavy die-cast metal chassis keeps the locomotive on track
- Constant, directional LED headlights add even more realism
- Pre-installed speaker
- 21-pin DCC plug
- RP-25 contour metal wheels
- Proto MAX metal knuckle couplers

40' Wood Stockcar with Dreadnaught Ends

Check [walters.com](https://www.walters.com) for current pricing.

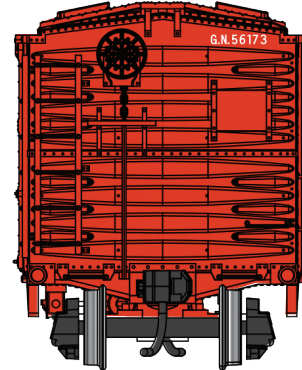

If you're modeling the mid-20th century on your layout, you'll want to add a couple or more of these distinctive WaltherMainline 40' stockcars to your H0 scale roster.

Since the 1800s, hauling meat on the hoof to market was a long-time business for North American railroads. By the mid 20th century, specialized stockcars were still hauling livestock on the rails but the cars had become modernized with many of the features found on other rolling stock of the era.

This WaltherMainline model captures many of the spotting features of these 1950s built prototypes, including corrugated steel Dreadnaught ends, metal roof and roofwalk and body mounted handbrake.

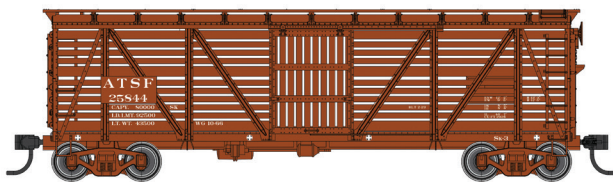

Other features include:

- Authentic slatted wood sides
- Detailed underbody with brake gear
- Proto MAX™ metal knuckle couplers
- 33" scale diameter RP-25 contour metal wheels

Each model features accurately detailed corrugated Dreadnaught ends.

40' Steel Boxcar with Murphy Ends

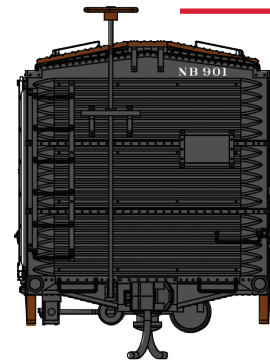

Check [walters.com](https://www.walters.com) for current pricing.

Bring realistic variety to your H0 freight car fleet with these detailed WaltherMainline replicas. Based on later rebuilds and upgrades of standard steel boxcars, these improved versions hauled all sorts of general freight from the 1920s into the 1960s. Some cars lasted even longer serving in MOW work trains into the 1980s.

Other features include:

- Simulated steel panel sides for a realistic appearance
- 5-5-5 Murphy steel ends
- Flat steel roof
- Straight underframe
- Vertical handbrake staff with separately applied brake wheel

- Detailed Andrew truck sideframes
- Detailed underframe with accurate AB brake gear
- Proto MAX[™] metal knuckle couplers
- 33" scale diameter RP-25 contour metal wheels

Morgan Olson® Route Star Van

Check walthers.com for current pricing.

Bring special deliveries, emergency services, and more to the streets of your H0 layout, whether in a small town or a busy city, with the latest run of SceneMaster H0 Scale Morgan Olson Route Star Vans.

Since the 1990s, the Morgan Olson Route Star has been the gold standard among walk-in, step-through vans used by businesses around the world. Now, Walthers is proud to offer newly tooled, officially licensed H0 Scale replicas that capture every detail of these hardworking vehicles.

Built tough for frequent stops, the Route Star is designed for efficiency, featuring easy access between the driver's seat and cargo bay to minimize time at each delivery. Beyond commercial use, these versatile vans have also become a favorite in the food truck industry, where the cargo space is often transformed into mobile kitchens.

With all-new paint schemes and authentic detailing, these Morgan Olson vans are the perfect finishing touch for any modern H0 Scale scene.

Features Include:

- Authentic body styles with (non-opening) accurately detailed rear door
- Detailed driving compartment with interior bulkhead
- Rolling wheels
- Clear window glazing
- Separately applied detail parts
